Connections •

1" Female NPT

1 1/2" Female NPT

For installation
between ANSI 150
flanges. { 2" Wafer
3" Wafer
4" Wafer

Recommended for indoor application only

Features

- Lightweight, Aluminum Construction
- Maximum Working Pressure 175 PSI
- Permanently Lubricated Bearings
- Low Frequency / High Frequency Pulse Output Standard
- Rugged Mechanical Index Rotatable Through 360°
- Self Supporting Line Mount Design
- Mount in Any Position
- Direct Read Odometer Type Index
- Rangeability: 20 - 1
- Operating Temp. 0°F. - +140°F.

Technical Data

E1 (series) reed contact

Max. Voltage: 24 Vdc
 Max. Current: 50mA
 Max. Capacity: 25 Watts
 Resistance: 100Ω ± 20%

E200 pulser

Standard Voltage:
 $U_n = 8\text{VDC}$
 Current consumption:
 active surface open: 1 □ 2.1mA
 active surface closed: 1 □ 1.2mA

Models SZ-65 to SZ-250

The accuracy curve illustrates that the error over the maximum capacity range is within guaranteed limits. An increase of density e.g. higher line pressure - does not change the accuracy
